## OCTAGON RECEIVER CONTAINERS

Sized to every need...

The attractive clean smooth sides of the IDS Octagon Container are both attractive and functional. The Octagon shape provides roll to the waste during compaction providing greater density per load. The smooth exterior has a more appealing design to blend with building lines.

## CLOSED RECEIVER CONTAINERS

- Flame cut from 1-1/4" steel, the lift hook goes through 3/4" pull plate and full welds on both top and bottom of pull plate.

- IDS latch handle provides safety chain to control door during opening — provide "draw" leverage for tight closure. Door guides for positive alignment.

- To withstand abuse, lead roller is double braced. For strength, gussets go under cross member and up front wall. Longer life is assured by lubrication through zerk fittings.

- 10" x 1/2" hinge plate — two hinges of steel fit across 7" channel corner post — preventing door sag.

### SPECIFICATIONS

MODEL	SKID LENGTH	A	B	C	D	E	F
24 yard	18' 6"	19' 4"	105"	96"	64 1/2"	46"	37"
33 yard	20' 6"	21' 4"	105"	96"	64 1/2"	46"	37"
42 yard	22' 6"	23' 4"	105"	96"	64 1/2"	46"	37"

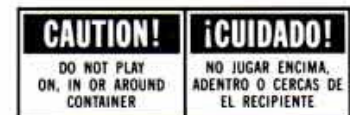

Understructure	3 inch, 4.1 lb. structural channel on 16 inch centers
Long sills	1/4 x 2 x 6 inch rectangular tubing
Floor	3/16 inch high tensile plate
Front and sides	3/16 inch steel
Rub rails	3 inch, 4.1 lb. structural channel
Wheels	8 x 12 inches on front 8 x 12 inches on door end
Tailgate	3/16 inch sheet
Tailgate braces	3 x 3 x 3/16 inches
Door	7 inch channel around door
Cable hook	1-1/4 inch plate
Weight	8,290 lbs.

Design and specifications subject to change without notice

### Available Custom Options

- Special understructure to fit any tilt frame
- Special door openings to fit any compactor
- Special door opening placement
- Special lengths
- Special widths
- Special drains for liquid problems
- Rubber door seals
- Ratchet hinges on both sides
- 3/8" push plate on front

Bilingual safety decals are provided to meet current A. N. S. I. standards.
