

Superior Training from TYMCO

We want you to understand the Regenerative Air System and your TYMCO Sweeper completely, so you can get optimal performance from your equipment investment. That's why, for more than thirty years, we've offered two-day scheduled training schools at our facility in Waco, Texas. Managers, owners, operators and mechanics get hands-on training and answers to specific questions. Enrollment levels are kept low, so you and your team will get personal attention as well as the opportunity to learn from the experiences of other attendees through the interaction of the class.

Model 600 Illustration

When your operators and mechanics are thoroughly trained and knowledgeable about the TYMCO Sweeper, you get better performance and a lower cost per operating hour.

- TYMCO offers full two-day schools
- Choose from over 30 schools scheduled per year
- Yearly class schedules and class agendas are available
- Learn through demonstrations on an operational sweeper
- Special schools arranged for large groups
- Register to attend on tymco.com

Specifically designed for training, our 3500 square foot, temperature controlled facility provides ample space for demonstrations on an operational sweeper and systems components. We also provide daily ground transportation from the hotel to our training facility, and lunch is on us.

Convenient Dealer Service Centers

In over 50 U.S. locations and dozens of others worldwide, you receive on-the-spot parts and service from TYMCO's network of dealers.

Model 435®

Regenerative Air Sweeper

From The People Who **Invented** Regenerative Air Sweeping!

- Superior Performance
- Ease of Maintenance
- TYMCO Reliability
- Maneuverability
- Operability

Model 435 Conventional Truck Package

- 8000 lb. payload.
- 132 inch overall sweeping path.
- 81 inch dump height.
- Adjustable high back air suspension seats, heated power mirrors, dual tilt steering with instrument panels and controls.

Large 4.0 cubic yard heavy duty, steel hopper increases sweeping time.

Patented centrifugal dust separator keeps fines and dust inside the hopper without exhausting air back into the atmosphere. There are no filters or baffles to replace. Accessible handle makes opening the cleanout port during washout quick and easy.

Streamlined side panels swing open for easy access to auxiliary engine.

Powerful 56 HP auxiliary engine.

Heavy duty hydraulic dump cylinders for high dumping heavy loads.

72 inch dump height enables dumping into various sized containers.

Extra large door allows for easy dumping and cleaning.

Convenient in-cab, operator friendly sweeper controls. Gauges and controls are illuminated for better night visibility.

Model 435[®] can be mounted on cabover or conventional cab chassis.

Floodlight and parabolic mirror.

Heavy duty Isuzu NQR 17,950 lb. GVW cabover chassis. (Can be equipped with optional dual steering for right curb view).

150 gallon water capacity for dust control.

Front and rear locking storage areas give you a combined 80 cubic feet of protected space.

Time-tested, heavy duty pick-up head propels a controlled jet of air through the blast orifice creating maximum pressure and powerful suction across the entire width of the pick-up head.

Patented TYMCO gutter broom(s) – with steel diggers or poly diggers – provides more cleaning power with less maintenance.
