# CONTROL SYSTEM

BlueLogic<sup>®</sup> Control System Multiplexed electrical system includes

hardware and TYMCO designed software that integrates the in-cab controls to all sweeper functions; as well as provides intelligent safety features, assists in troubleshooting through LED input/output diagnostics, and controls the hDrive Power System. Specific to the 210h, BlueLogic communicates with the truck to engage the PTO and maintain the blower at a constant speed (low or high), and monitors and controls the hydraulic oil level and temperature shutdown system.

#### Interior Components

Leaf pressure bleeder control, illuminated control switches: pick-up head, gutter broom, blower on/off (2 speeds), dust control water system nozzles (if applicable), safety lights **Exterior Components** 

Dump switch, BlueLogic multiplex module

## **SAFETY/WARNING DEVICES**

Back-up alarm

Alternating LED rear flashers (2) BlueLogic<sup>®</sup> Control System provides several safety interlocks which includes stopping the blower when the hopper is raised/hopper door is opened, shutting down the hydraulic system when hydraulic oil temperature is too high or the level is too low and disengaging the PTO when excessive ground speed is met (default is 18 mph). It also provides ASI, which will lift the gutter broom when the transmission is

placed in reverse. Hopper safety prop
